Hi Dan-
I've loaded the remainder of Region 8 data for 2011 into the Upper Animas/Cement Creek database.
Please refer to the subscription information below to download the latest version of the database.

Let me know if you have any questions.

Thanks,
Scout

Hi Dan-
I've loaded all of the data from Paragon for 2011 as well as Mar/Jun/Jul/Aug 2011 data from the Region 8 lab into the database that I have. Spatial data has been updated and Field Chemistry parameters are loaded into both the Water Sampling and the Lab Results tables. The database is published to Scribe.NET under the following subscription:

Subscription ID: UAnimas
Password: UA

Let me know if you have any questions.

Thanks,
Scout

Hi Scout
We will not be formatting data for ARSG. They will be getting a subscription to the database once the 2011 EPA data is in the database. Please let us know when you have the May, June, July data in the database. I will follow up with Bill B. re: the August data.
Thanks
Dan

Mike

I got a follow up call from Scout today. She has been working with Bill Batschelet who is the QA guy at the lab. Apparently all data has to get his approval before it goes out the door. This is the status of the data from 2011 as Scout understands it.

May, June, July - Data is available and Scout will be loading it to SCRIBE.
Aug - Should be available "soon"
Sept, Oct - Not in and likely not available by mid Jan
Nov - Sampling event was cancelled

The note that Sabrina sent a while back, that she received from Bill, indicated that they did not have any 2010 data. It is my understanding that Sabrina sent them 2010. Is this correct Sabrina?

In regards to your comment below Mike:
Is the attached spreadsheet the format in which we are to provide the data to Bill or are we to get the data into SCRIBE for them to access it? I recommend that we get it into SCRIBE and they can format it

any way they like. We will likely have to manually provide the data in this format which makes us vulnerable to making an error.

Either way we will need this data in SCRIBE but I need clarification.

Thanks
Dan

Subject: ARSG data format

Hi Mike, turns out your still in my email address book. Thanks for your help pushing for getting us the data. Attached is the format we have been using forever for our data.

I just received a call this morning from the BOR that they have discontinued taking water samples at the 4 gauges in Silverton as of this month. It isn't totally unexpected as one fellow recently retired that championed our efforts and warned us they were no longer funding the program. We slid though the last 6 months inappropriately riding on another (ALP) program but they caught that. I had requested continued funding by contacting the right people but they just couldn't do it anymore. They will continue taking sample in Durango and below for metals since that is permanently funded through the ALP program.

We will be meeting with CDOW Riverwatch (Barb Horn) soon to discuss what we will do. So the discussion of using Lisa through EPA may have been a timely thought last night!

The operation of the gauges comes up every year but Steve Fearn's role on the SWCD board is strong and he feels we're in a pretty secure position for the foreseeable future.

Bill
